It's NOT BIG but it is CLEVER

Air is an entirely unique concept in micro powered access:

- Designed to compliment it's working environment, to be unobtrusive and blend with it's surroundings
- Enjoy the benefits of a product engineered for your workplace and not building sites
- Almost silent in operation
- Lightweight and exceptionally manoeuvrable
- Will not damage or mark floor surfaces, walls and doors
- Compact, suited to narrow aisles and confined areas
- Operators quickly feel comfortable and confident when using *Air*

Air is designed for your workplace and workforce:

- Minimal floor loading, almost silent in operation, compact size, exceptional manoeuvrability and smart unobtrusive appearance make *Air* your ideal partner for all overhead applications in all public access environments.
- Shop dressing and signage, cleaning, maintenance and repair, archives and stock picking, duct work and piping, decorating, lighting and electrical to name a few.

Why Choose Air?

- *Air* has been specifically designed for public access environments such as shops, offices, hospitals and hotels. Unlike products intended for the building site, *Air* is not big, bulky and awkward to move.
- *Air* works with it's environment, it is safe and simple to operate. The emphasis is on good unobtrusive design. *Air* requires no set up time and compliments the workplace without disruption to the working day.
- *Air* is the culmination of over 40 years' design and manufacturing experience and is supplied with a three years' parts and labour warranty.
- Your entire workforce will quickly feel comfortable and confident using *Air*, it is operator friendly and very intuitive.
- *Air* is fully compliant with all relevant regulations and legislation, CE marked and supplied complete with operation decals and instructions, certification and manual.
