**Architects: No space for a ramp? Your Solution – Found!**

[www.BinLifts.co.uk](http://www.BinLifts.co.uk)

Commercial & domestic bins can be moved between levels cost effectively and at the touch of a button, both safely and swiftly. Raise your bins from basement to ground level, from yard to loading dock, from shop, restaurant or bar level to street level – no need for back breaking, space consuming ramps.

Steps and stairways need no longer be a problem, heavy, awkward bins can be elevated with ease and in complete safety. Our designs are suitable for home and commercial premises use such as bars, clubs, restaurants, hospitals and care-homes, office environments, apartment blocks, shops, hotels and laundries. Bins can be stored and secured out of sight and elevated or lowered to the required height for emptying.

Handrails, gates and guards are produced to suit your bin type, aesthetic requirements and safety considerations. Design drawings are available for your approval to ensure that we always meet and exceed the clients expectations.
